

# Your patient needs a blood transfusion, WHAT'S NEXT?

## VERIFY THE FOLLOWING:

- There is still a **CURRENT** physician order
  - The order must be **RELEASED** (use the Blood Administration Doc Flow Sheet) in IHIS prior to the release slip printing. Orders are acceptable for 24 hours from the time the order is released from the hospital information system.
- There is a **SIGNED** consent form

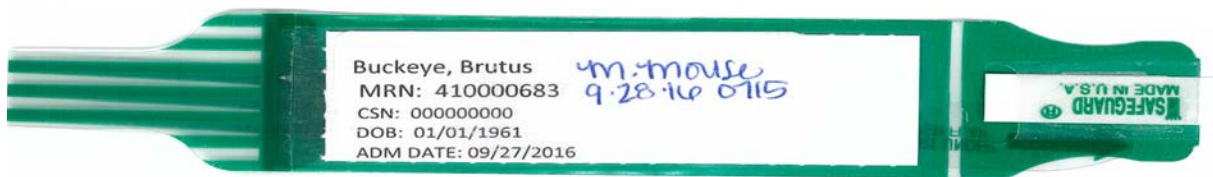

## Inpatient

This consent will be good for the entire stay in the hospital

Please read this document with care. **Please cross out and put your initials next to any item on this form for which you do not grant consent.** After you have read it, please sign on the other side if you give consent for the blood or blood product to be transfused.

1. My name is \_\_\_\_\_ I have talked to my doctor(s) \_\_\_\_\_ about my condition, which is (symptoms or diagnosis): \_\_\_\_\_

- There is a **CURRENT** and **CORRECT** Blood Bank Green Armband

- Patient vitals are **STABLE**
  - If vitals are abnormal consult a physician or licensed provider.
- There is **ADEQUATE** IV access

If all items are **VERIFIED** and **CORRECT**, send/take release slip to Transfusion Services
